WITH THE REMINGTON RAND RE-210, MOST OF THE TIME SPENT TYPING A LETTER CAN ACTUALLY BE SPENT TYPING THE LETTER.

INTRODUCING THE RE-210. A REMINGTON RAND ELECTRONIC TYPEWRITER.

You probably think that with an electric typewriter all the time spent typing a letter is spent typing. But it really isn't.

Just consider the time spent getting ready to type. Setting up the machine. Lining up the paper. Fixing margins and tabs. And if the job calls for something unusual, like perfectly aligned columns of numbers, you could be there all day.

That's why we're introducing the RE-210 electronic typewriter. It's designed to do automatically, many of the jobs you do manually. Making typing easier, faster and more enjoyable.

But even though it will let you speed through your work, the finished product will never look hurried.

DON'T LET ITS LOOKS SCARE YOU, IT'S STILL JUST A TYPEWRITER.

Although the RE-210 is somewhat larger than the ordinary typewriter. And it doesn't look like any typewriter you've seen before. Don't be afraid. Deep down it's still just a typewriter. No more complicated to use than the one you're using now. In fact, it's actually easier. So much easier, that in just one hour you'll be typing like you had one all your life.

YOUR OFFICE WILL BE MORE PRODUCTIVE BECAUSE YOU'LL BE DOING LESS MANUAL WORK.

The minute you begin to type on the RE-210 you'll start doing less work. First of all you'll never have to manually load the paper. Or play with it to make it straight. The RE-210 loads itself. Perfectly straight.

Then a simple touch of a button sets your margins. Another sets your tabs. It's that simple.

FULL LINE CORRECTION MEMORY.

The RE-210 makes correcting mistakes as easy as they were to make.

Touch the correction key and start again. You can erase a letter, a word, or even a whole line. Without paying for your mistakes by wasting a lot of time.

DECIMAL TABULATION.

You'll also save a lot of time lining up columns of numbers. Because with the decimal tabulation feature, columns and different length numbers (with or without decimals) will always be perfectly aligned, automatically.

DAISY WHEEL PRINTER.

The daisy wheel printing feature on the RE-210 assures you of always getting a high quality finished product. Good enough to sign your name to.

The RE-210 also offers reverse tabulation, index and reverse index, a half space key, an express key, triple line spacing and page end indicator. And all the keys can be repeated automatically.

Even though the RE-210 does more than your electric typewriter, it does it all with a lot less noise.

RELIABILITY.

Not only is the RE-210 a typewriter of the future, but its high reliability will be unlike anything you've experienced in the past. There's less chance for parts to break down. Because state-of-the-art electronic technology gives the RE-210 fewer parts. Hundreds less than today's electric typewriters. Which means it'll be more reliable and easier to service than any typewriter you've ever had before.

BUT EVEN WITH ALL ITS FEATURES THE MOST IMPORTANT ONE IS STILL ITS NAME.

Over 100 years ago, Remington Rand introduced the first typewriter in America. Since that introduction in 1873, Remington Rand has used the most up-to-date technology to keep pace with our customers' changing needs. So when you're ready to buy the typewriter of the future, buy it from the one company with a long typewriter past. Remington Rand.

SPECIFICATIONS

92 character electronic keyboard.

Eight character buffer memory.

Automatic one line correction.

Dual pitch, 10 and 12.

Easily interchangeable daisy wheels.

Ample paper capacity.

14⅛ inch writing line.

Typing speed, 17.5 characters per second.

Copy control.

Electronic margin settings from keyboard.

Triple line space setting from keyboard.

Decimal tabulation.

Cartridge ribbons.

Correctional half spacing, electronically controlled.

All keys repeat.

72 hour memory protection.

Printer return with line spacing.

Printer return without line spacing.

Up and down index keys.

Tabulator.

Reverse tabulator.

Single and total tab clear.

Automatic paper insertion and ejection.

Page end indicator.

Dimensions: 35 lbs. 6.5″ x 22.8″ x 18.1″

Acoustical sound hood.
